

## Pattern Correction: Mary De #67

These corrections only apply to the revised Mary De pattern released in October 2016. If your pattern was printed prior to 2016, your pattern is in a paper printed envelope. The revised version has navy and aqua branding and the image as seen here.

### Instructions

1. The cutting layout has wrong size labels for both layouts with 45" wide fabric on the first printing of page one of the instructions. The first heading should be 6mo-3 and the second layout heading sizes 4-8.
2. On page 3 of the instructions in the Assemble Dress section, the diagram in #3 is incorrect. Please reference the diagram below. This can be seen on the first version of page 3 (CCP67-1).

## How to Determine Which Pattern Version You Have

As we find printing errors, we will make corrections to the subsequent printings of covers, instructions and patterns. We began including trackable version codes with the newly branded pattern covers and patterns with the navy and aqua branding. Make sure to check the version number for the item specified as the covers, instructions and patterns are all printed separately. Patterns released prior to the navy and aqua branding like those in the top pink band or paper envelopes do not have a code to track versions.

For covers, the version code is found on the back cover at the bottom. There will be a code like "CC3S-1". The last number, in this case 1, is the version of the cover. In this example, this is the first printing of the cover. From time to time, we may apply a sticker to the covers to fix an error between printings.

For instructions, the same version code is found in the bottom right-hand corner of each instruction page. Each sheet can be updated separately, so check each page.

For patterns, the same version code is found on each page of tissues. Each sheet can be updated separately, so check each page.
