

Pattern Correction: Lucy #241

These corrections only apply to the revised Lucy cover released in July 2017. If your pattern was printed prior to 2017, your pattern is in a paper printed envelope or pink branding. The revised version has navy and aqua branding and the image as seen here.

Cover - Fabric Requirements

The fabric requirements for a size 2 View B with 45" wide fabric should read 1 ³/₈. This error may be found on some of the covers from the first printing; however, many were corrected with a sticker.

How to Determine Which Pattern Version You Have

As we find printing errors, we will make corrections to the subsequent printings of covers, instructions and patterns. We began including trackable version codes with the newly branded pattern covers and patterns with the navy and aqua branding. Make sure to check the version number for the item specified as the covers, instructions and patterns are all printed separately. Patterns released prior to the navy and aqua branding like those in the top pink band or paper envelopes do not have a code to track versions.

For covers, the version code is found on the back cover at the bottom. There will be a code like "CC3S-1". The last number, in this case 1, is the version of the cover. In this example, this is the first printing of the cover. From time to time, we may apply a sticker to the covers to fix an error between printings.

For instructions, the same version code is found in the bottom right-hand corner of each instruction page. Each sheet can be updated separately, so check each page.

For patterns, the same version code is found on each page of tissues. Each sheet can be updated separately, so check each page.
