Pattern Correction: Lee #10

These corrections only apply to the revised Lee pattern released in March 2017. If your pattern was printed prior to 2017, your pattern is in a paper printed envelope. The revised version has navy and aqua branding and the image as seen here.

sizes 6mo-3
LEE

children's corner PATTERNS

Pattern

1. The pattern piece #8 VIEW B Front and Back Skirt should read "Cut 2 on fold."

2. The pattern piece #11 Collar with Trim, does not have the front and back marked. To identify the front and back, the logo is located on the back of the collar pattern piece.

Instructions

1. In step 21, instructions are only for view B. If you are sewing View A, your skirt will not have armholes.

How to Determine Which Pattern Version You Have

As we find printing errors, we will make corrections to the subsequent printings of covers, instructions and patterns. We began including trackable version codes with the newly branded pattern covers and patterns with the navy and aqua branding. Make sure to check the version number for the item specified as the covers, instructions and patterns are all printed separately. Patterns released prior to the navy and aqua branding like those in the top pink band or paper envelopes do not have a code to track versions.

For covers, the version code is found on the back cover at the bottom. There will be a code like "CC3S-1". The last number, in this case 1, is the version of the cover. In this example, this is the first printing of the cover. From time to time, we may apply a sticker to the covers to fix an error between printings.

For instructions, the same version code is found in the bottom right-hand corner of each instruction page. Each sheet can be updated separately, so check each page.

For patterns, the same version code is found one each page of tissues. Each sheet can be updated separately, so check each page.
